Discussion

A world map with a light green and blue color scheme. The Middle Eastern region, including Turkey, Iraq, Iran, Saudi Arabia, and the Gulf states, is highlighted in a darker green. Numerous small icons of national flags are placed over various countries in this highlighted region. The word "BIOGRAPHY" is written in large, bold, black capital letters across the center of the map.

Martine Pergent

Patient Advocate | Global Health Leader | Expert in Primary Immunodeficiencies and associated diseases

Martine Pergent is a dedicated volunteer patient advocate representing people with primary immune deficiencies (PIDs) worldwide. She has extensive experience in patient rights advocacy, global health initiatives, and fostering collaboration between patient organisations, healthcare professionals, and policymakers. Since October 2018, she has served as President of IPOPI (International Primary Immunodeficiency Patient Organisation), where she works to enhance access to early diagnosis, personalised treatments, and innovative healthcare solutions.

Her expertise includes establishing new patient organisations, particularly in low- and middleincome countries, and promoting advancements in medical and social sciences, innovative treatments, artificial intelligence, and health data collection. She is actively engaged in international networks, ensuring patient representation in key medical and research initiatives.

She promotes patient participation in any project that concerns them. Martine believes that cooperation with all the players in the healthcare ecosystem, first and foremost physicians and healthcare professionals, is essential.
